PART 1 — WHO IS ABRA

CORE PLATFORM

Three Pillars of Digital Wealth

Institutional-grade infrastructure for custody, yield, and liquidity — all under one roof.

Vault

Segregated custody in your name. Fireblocks MPC wallets with enterprise-grade security and fiduciary-grade compliance. Title to assets remains with you at all times.

Yield

Proprietary yield strategies on BTC, ETH, SOL and stablecoins. Staking, model portfolios, and DeFi-based alpha generation managed by an experienced investment team.

Loans

Borrow against BTC or ETH at up to 50% LTV. Competitive rates from 4–8% APR, open-term with no required monthly payments. Up to $5M per client.

WHY ABRA

What Sets Us Apart

- ✦ SEC-REGISTERED INVESTMENT ADVISOR
- ✦ SEGREGATED ACCOUNT INFRASTRUCTURE
- ✦ ENTERPRISE CUSTODY VIA FIREBLOCKS
- ✦ PROPRIETARY YIELD & MODEL PORTFOLIOS
- ✦ WHITE-GLOVE DEDICATED COVERAGE

PART 2 — YIELD CAPABILITIES

STRATEGY ARSENAL

Proprietary Yield Engine

Nine institutional-grade yield strategies spanning DeFi, derivatives, and structured products — actively managed to capture alpha across market regimes.

🔄 Perpetual LP Hedging

Delta-neutral exposure to perpetual exchange LP pools (JLP, GLP/GM). Captures trading fees and borrowing revenue while hedging directional risk via perp shorts on constituent assets.

YIELD: TRADER PNL · BORROW FEES · REBALANCING PREMIUMS

💧 DeFi Market Making

Concentrated and full-range liquidity provision across AMMs. Active position management to optimize fee capture relative to impermanent loss.

YIELD: SWAP FEES · LIQUIDITY MINING INCENTIVES

📌 Fixed Rate / Yield Tokenization

Strategies on yield-splitting protocols (e.g. Pendle) to isolate and trade fixed vs variable rate exposure. Includes YT directional plays and PT discount capture.

YIELD: FIXED RATE LOCK-IN · YIELD TOKEN MISPRICING

🔁 Stablecoin Lending & Looping

Leveraged supply-side strategies across lending markets. Deposits stablecoins as collateral, borrows, and re-supplies — amplifying base lending yield across multiple loops.

YIELD: NET SUPPLY-BORROW SPREAD

🎯 Yield Aggregation

Systematic allocation across lending markets and vaults for the highest risk-adjusted supply rates. Dynamic rebalancing across protocols and chains as rates shift.

YIELD: OPTIMIZED LENDING APY

⛓️ Staking & Liquid Staking

Native and liquid staking across PoS networks. Includes restaking and LST yield optimization for compounding protocol rewards.

YIELD: PROTOCOL INFLATION · RESTAKING REWARDS

📊 Options Overlay

Systematic covered call writing on BTC/ETH via Deribit. Sells OTM calls against existing positions to capture volatility premium. Cash-settled, no physical delivery risk.

YIELD: THETA DECAY · IMPLIED-REALIZED VOL SPREAD

⚖️ Basis Trading

Captures the spread between spot and perpetual prices. Long spot, short perp — a market-neutral strategy that harvests structural premiums.

YIELD: FUNDING RATE COLLECTION

🔀 Funding Rate Arbitrage

Cross-venue funding rate capture between perpetual exchanges. Long on the venue paying funding, short on the venue charging it. Market-neutral with yield from persistent rate differentials.

YIELD: CROSS-VENUE FUNDING RATE DIFFERENTIALS

PART 3 — INVESTMENT OPPORTUNITIES

AVAILABLE NOW

Today's Yield Opportunities

Four distinct strategies available today — each targeting different risk profiles and return objectives, all within Abra's segregated custody infrastructure.

BITCOIN STRATEGY

BTC Yield Strategy

Directional exposure to BTC beta with the objective to grow your BTC holdings. Yield earned in-kind via leading DeFi protocols through lending and liquidity provisioning.

- ✓ Title to assets remains with client
- ✓ Fireblocks MPC wallet — keys split across parties
- ✓ Private keys backed up by third-party administrator
- ✓ Optimal way to hold and earn additional BTC

Historical Yield	**~2–4% APY (alpha vs. BTC)**
Structure	**Managed Account**
Investment Minimum	**None**
Management Fee	**None**
Withdrawals	**End of each month (30 days)**

Custody	**Fireblocks MPC**

USD STRATEGY

USDAF & sUSDAF Yield

Exposure to sUSDAF, a decentralized stablecoin on Solana generating yield through delta-neutral strategies — staked SOL hedging and liquidity provisioning.

- ✓ Title to assets remains with client
- ✓ MPC wallet — keys split across parties
- ✓ Seasoned team with deep DeFi + TradFi experience
- ✓ Daily reporting & liquidity (as of 4/1/26)

Target Yield	**4–10% APY**
Structure	**Managed Account**
Investment Minimum	**None**
Management Fee	**1.00% / year**
Subscriptions	**USDC or USD**
Liquidity	**Daily (as of 4/1/26)**

FUNDING **8–16% Target**

LENDING **3–7% Target**

LP **8–11% Target**

ARBITRAGE **9–20% Target**

* Target yield ranges are per source and non-additive. Net yield shifts with market regimes.

ETHEREUM

The Case for ETH

The foundational infrastructure layer for DeFi, smart contracts, and tokenized assets — a strategic allocation for the programmable economy.

- ✓ 60%+ of all on-chain AUM across DeFi
- ✓ Deflationary mechanics via EIP-1559 fee burning
- ✓ Native staking yield of 3.5–4.5% APY
- ✓ Abra offers staking + DeFi yield overlay

Native Staking Yield	**3.5–4.5% APY**
DeFi Enhancement	**Additional alpha via lending & LP**
Custody	**Fireblocks MPC**

SOLANA

The Case for SOL

High-performance blockchain of choice for real-time applications, payments, and DeFi — institutional-grade throughput at a fraction of competing chains' cost.

- ✓ 65,000+ TPS with sub-second finality
- ✓ Surging DeFi TVL and developer activity
- ✓ Competitive staking yields of 6–8% APY
- ✓ Native home of USDAF / sUSDAF

Staking Yield	6–8% APY
Transaction Cost	< $0.01
Custody	Fireblocks MPC

MODEL PORTFOLIOS

Professionally Managed Crypto Portfolios

Aligned to a range of investor risk preferences, all held within segregated, separately managed accounts (SMAs) with direct ownership.

LOW RISK

Conservative (Stablecoins)

Maximize capital preservation via concentrated stablecoin allocation, deployed on institutional-grade DeFi platforms for consistent yield.

100% — Abra USD Yield Strategy

Key Feature: 4–15% annualized yield with zero exposure to crypto price volatility.

LOW RISK

Conservative (Bitcoin)

High conviction BTC allocation for long-term appreciation, earning yield via DeFi lending and liquidity on institutional-grade platforms.

100% — Abra BTC Yield Strategy

Key Feature: "Get off Zero" — asymmetric upside with lower volatility vs. other crypto assets.

MODERATE RISK

Moderate

Balanced capital appreciation combining core BTC exposure with high-growth large-caps (ETH, SOL) and stablecoin alpha.

60% — Bitcoin (BTC)

40% — Abra Digital Income Strategy

Key Feature: Core safe-haven + high-growth large-caps. Alpha and diversification reduce volatility.

MODERATE-HIGH RISK

Moderately Aggressive

Outsized growth through substantial high-growth large-cap exposure (SOL, ETH), complemented by core BTC and stablecoin yield.

30% — Bitcoin (BTC)

70% — Abra Digital Income Strategy

Key Feature: Strategic high-growth large-cap exposure for maximum upside potential.

THE NEXT FRONTIER

The Tokenization of All Assets

The tokenization of real-world assets — from treasuries and equities to real estate and private credit — represents a $100+ trillion addressable market.

🏦

$100T+ Addressable Market

BlackRock, JPMorgan, and major institutions are actively tokenizing treasuries, bonds, and fund shares — signaling tokenization is an institutional imperative.

⚡

24/7 Settlement & Liquidity

Tokenized assets settle in minutes rather than days, trade around the clock, and unlock global liquidity pools — eliminating legacy infrastructure friction.

🌉

Abra's Position

As an SEC-registered advisor with institutional custody, Abra is uniquely positioned to bridge traditional finance and the on-chain economy for tokenized asset access.
